From our home...

It all began in 1973 when a former flooring installer created a small business from his family home.

With the belief that luxury vinyl flooring shouldn't just be practical, it needed to be beautiful as well, Karndean was formed. The team set out to travel the world, seeking inspiration from natural materials for what now are the most realistic luxury vinyl flooring products on the market.

The Karndean team worked out of that house for several years with the family's trusty dog Smokey, the Great Dane who is still present on Karndean's logo today. For the family and Karndean's early employees — many who are still working with us today — these years bring back many fond memories.

Now stretching across the globe, far beyond the walls of the original house, we continue to move forward with the same passion to deliver beautiful, innovative designs for your home.

...to your home

Many elements must fit together, from furniture to flooring, to fixtures and everything in between.

Where to begin?

We begin a new design with inspiration, and we are most inspired by nature. What's your design motivation? Is it aesthetic, such as a cushion or the perfect paint chip? Or is it lifestyle, a place where you can dance in your pyjamas and your babies (both two and four-legged) can roll around and play?

No matter what drives you, Karndean Designflooring was created with your needs in mind. We see flooring differently and by combining original features with cutting edge design, you can create a simply beautiful floor that you will love for a lifetime.

Our simple method will help you navigate the selection process and design your perfect floor, taking you beyond picking a colour and measuring the room. Let's get started!

Our interior trends

At Karndean Designflooring we set out to understand what that means in design trends. While we identified four clear and different directions in interior styling, they share a common heart: the home as a sanctuary.

Scan here to find out more about our interior trends

50 years of experience

At Karndean, we see flooring differently.

We travel the world in our quest to bring you exceptional floors that inspire and delight. From the ancient forests of Europe, to the remote Australian outback and beyond, we seek out expressive and intriguing forms in the natural world to influence our unique floor designs. By combining these original features with cutting edge design, we create simply beautiful floors that you'll love for a lifetime.

For the family and Karndean's early employees, many of who are still working with us today, these years bring back many fond memories. Now stretching across the globe, beyond the walls of the original house, the Karndean family and employees continue to move forward with the same passion to deliver beautiful, innovative designs for your home.

1973...

Designed for you

Every one of our floors is unique to us having been lovingly created by our in-house team. Our product designers select natural woods and stones to work with, taking the time to carefully replicate the knots, grains and textures found in these products into our designs. Working with these products they apply different techniques of staining, brushing and oiling to name a few to create the perfect look and feel bringing you a simply beautiful floor.

Did you know?

Back in 1973, Smokey the Great Dane worked alongside the family and is still present on our logo today.

Pet friendly

From muddy paw prints to household accidents and anything in-between, our low maintenance floors are designed with pets in mind.

Durable

Karndean Designflooring gives you the look and feel of natural products with the durability and resilience of luxury vinyl.

Designed for
comfort

Kid friendly

Karndean floors offer kids a safe and comfortable space to play, and parents an easy-to-clean surface.

Low maintenance

Easy to clean with a sweep and mop. Doesn't require sanding, varnishing or staining.

Phthalate free

We pride ourselves on environmental awareness in the manufacture and supply of all our products, and can proudly say that all Karndean products are phthalate free.

Designed for
peace of mind

Quiet underfoot

Karndean Designflooring offers formats that reduce noise transfer by up to 22dB – perfect for upstairs bedrooms, playrooms or attic/loft conversions.

Lifetime warranty

Not only is a Karndean floor unique to your home, but it's guaranteed to last for years to come.

Rigid core's unique benefits

Rigid core

Korlok is a hybrid flooring product featuring our proprietary K-Core® technology, a 5G® click-locking mechanism and a specially formulated acoustic backing, and as such, is an ideal alternative to laminate and engineered hardwood click floors. Offering quick and easy installation and hiding subfloor imperfections, it also has the durable and waterproof qualities of luxury vinyl.

Together these layers form a product that is strong and stable, and able to be installed quickly and easily over most existing hard floors, as well as over imperfect subfloors as well as offering impressive acoustic benefits in reducing noise transfer to rooms below.

Installs over existing hard floors: You want to install over an existing floor such as ceramic tiles or floorboards, or uneven subfloor.

Reduces noise transfer: The premium, pre-attached acoustic foam backing reduces noise transfer to rooms below, making it perfect for upstairs bedrooms, playrooms or attic/loft conversions.

Quick and easy to install: Click-locking systems allow the installer to quickly drop and lock planks together, meaning less upheaval and disruption to everyday life.

Click-locking mechanism: Get all of the benefits of rigid core with the added security of a superior vertical click-locking mechanism.

Hides subfloor imperfections: Minor subfloor imperfections won't show through our rigid core backing, meaning most installations won't require the use of levelling compounds or underlayments.

InteGrout™: Korlok tiles with InteGrout™ is the premier rigid core click-locking floor to hide subfloor imperfections and features a number of elements that help both the speed and ease of install - perfect for projects that need completing quickly. Unlike typical textured grout, smooth and nonporous Karndean InteGrout™ will neither harbor dirt and bacteria nor crack with seasonal temperature fluctuations. Keep a look out for this icon throughout this brochure to see which designs include InteGrout™.

Premium rigid core construction

5G® is a patented technology invented by Välinge Innovation AB. The 5G® word mark and logo are registered trademarks owned by Välinge Innovation AB. * Selected designs.

Laying patterns

Rigid core

Choosing your laying pattern

It's not just the floor you choose, but the direction you lay it that makes a lasting impression. So how do you know which way you should lay your floor? Keep these pattern options in mind as you browse our three product constructions (formats), as select floors cannot be laid in all of these patterns. Please speak to your retailer or installer to discuss your options.

Wood with a

soul and a story

Scan to read more about
our our Korlok woods

Our source of inspiration

For decades, Karndean Designflooring has led the way in durable, luxury vinyl flooring. Our designers draw inspiration from the natural world, perfecting and curating our ranges so each one is as unique as you and your space. Innovative technology and quality materials ensure you own a beautiful floor true to the natural material that inspired it.

Spotted Gum

The Spotted Gum tree flourishes in coastal areas along the eastern seaboard of Australia, ranging from the mountains of the Great Dividing Range to the sunshine coast of Queensland. Large amounts of sapwood can be seen within the boards and this adds to the blend of features that make the product so distinctive. Even when coloured, the sap creates a tonal plank that will work in all interiors.

Australian Ghost Gum

These boards were taken from the evergreen, fast growing species that is native to central Australia. The linear grain is caused by the tree's speed of growth and results in beautiful colour variation. This variation in colour hues creates a striking canvas that will add impact in any interior yet will also work with many other objects to create a harmonious space.

Butternut

Often referred to as white walnut, the original butternut planks were sourced from the Eastern parts of the United States. Real butternut is even softer than walnut, making it highly impractical when it comes to flooring, but with Korlok you have the beauty of the real wood in a highly durable format.

Blackbutt

A quintessential Australian hardwood that takes its name from the lower half of the tree's trunk which is blackened by the fierce forest fires that both destroy, and then renew. These boards were sourced from the very North of New South Wales where thick forests merge with the beautiful coastline. Great care was taken to retain the oozing sap lines that add to the distinctive linear grain and bleed into the timber.

*As a feature of the design, these products incorporate a high variation between individual planks.

Texas Ash

Ash boards are dominated by an attractive straight grain with just the occasional hint of a flowery grain. In its natural format, the wood is a consistent, neutral colour due to the tree's growth in limestone soil types with very little rainfall.

Canadian Oak

These nature grade planks feature a straight grain detail which is then blended with a small amount of character grade wood to produce a clean, neutral floor design.

Baltic Oak

The distinctive markings of the Baltic Oaks were achieved by mixing grades, from ultra-prime to nature grade boards. The original planks were machine brushed to create a unique open grain and coloured oils were hand applied to create a limed effect.

Painted Acacia

This beautiful species is rarely seen in modern flooring due to its strong colouration and irregular appearance. The natural product is difficult to alter due to its impervious nature, so after a light wire brushing to unearth the internal beauty of this timber, we "painted" the boards to darken and neutralise the original red tones, resulting in a beautiful, unique design that really has the wow factor.

English Oak

This characterful oak was sourced from the ancient British woodland of South Oxfordshire. Its weathered look allows for a muted yet distinctive floor while the tonal variation across the boards creates an appealing blended effect.

European Oak

These European boards were hand selected as a trusted raw material and canvas to work with. The light speckling seen within the tight grains occur due to the rapid dehydration of the boards once felled. We then hand applied coloured oils to produce on-trend colours to complement the existing range.

American Barnwood

The marvellous rusticity and rotary saw markings of this salvaged American lumber create an unmistakably unique floor with unlimited potential for application. The heavy tonal shifts within this product have been enhanced by layers of natural, hand-applied finishing oils. The lively colours and character shifts generate an eye-catching floor and promote the wood's extreme variation of features, providing a real statement floor for any interior.

Brushed Oak

This batch of European Oak boards were hand selected to create a combination of flowery and straight grain boards and then brushed to heighten this interesting grain pattern. The subtle texture of the original planks, which comes across in the final emboss, adds a subtle layer of detail to the individuality of this product.

*As a feature of the design, these products incorporate a high variation between individual planks.

our our Korlok stones

Our source of inspiration

For decades, Karndean Designflooring has led the way in durable, luxury vinyl flooring. Our designers draw inspiration from the natural world, perfecting and curating our ranges so each one is as unique as you and your space. Innovative technology and quality materials ensure you own a beautiful floor true to the natural material that inspired it.

Italian Marble

Calacatta marble has long been recognised around the world for its striking beauty and was allegedly Michelangelo's favourite stone to carve from. It originates from one single source: a mountainous area of Italy known as the Apuan Alps, making the original product both limited and expensive. Our design team spent over a year developing our Palazzo Marble design. It features the classic grey veining that graces palaces and cathedrals throughout Italy, a cool classic that oozes elegance.

Limestone

Recognising the trend for tiles with neutral, understated colour tones, our product designers chose a batch of subtle limestone to work from. The porous nature of limestone gives it great staining capabilities, allowing degrees of re-colouration that are impossible with most other types of stone. The original grey limestone was used to produce further shades of black and white, as well as a light sandy colour reminiscent of the traditional stone found in the Cotswolds, UK and recognised the world over.

Concrete

'The Concrete Look' has evolved into a clean contemporary style that features much depth and character. Our designers experimented with different colouring techniques to transform the classic, neutral design into an incredibly versatile, contemporary set of concrete look tiles. Each colour variation highlights different features contained within the design. The result is an attractive product that adds a new warmth and elegance to a solid industrial material, making it appealing for both commercial and residential applications.

Terrazzo

Terrazzo originated in Italy where quarry workers used stone offcuts in their own homes. Traditional colourful terrazzo looks are being seen alongside more modern looks with tone on tone tiles suiting the ongoing preference for a more neutral floor design. In order to hit the combined concrete and terrazzo trend, they removed the coloured chips, to then insert a concrete backdrop that would be visible. The aim was to provide a more neutral look, allowing the tone to be the biggest attribute whilst leaving the terrazzo features visible but not as dominating as in the original stone.

*As a feature of the design, these products incorporate a high variation between individual tiles.

We offer three types of product

We know that choosing a floor that suits you and your home can be challenging. That's why we offer our beautiful, designed floors in either loose lay, rigid core or gluedown. So you can enjoy exactly the design you want, in the format you need. Please speak to your installer or retailer to discuss your options.

Loose lay

Choose loose lay when...

- You want to reduce noise transfer, such as in loft conversions or upstairs rooms.
- You want a quick installation.
- You have a completely flat, dry subfloor, prepared by a flooring professional.

-  Individually replaceable
-  Quick and easy to install
-  Reduces noise transfer
-  K-Wave® friction grip backing
-  Laying possibilities

Rigid core

Choose rigid core when...

- You want superior acoustics, such as in loft conversions or upstairs rooms.
- You want a quick installation.
- You want to install over an existing floor such as ceramic tiles or floorboards, or uneven subfloor.

-  Click-locking mechanism
-  Reduces noise transfer
-  Quick and easy to install
-  Installs over most existing hard floors

Gluedown

Choose gluedown when...

- You want to create your floor, with different laying patterns, design strips and decorative borders.
- You want to be able to mix stone and wood designs and create a completely bespoke floor.
- You have a completely flat, dry subfloor, prepared by a flooring professional.

-  Individually replaceable
-  Design capabilities
-  No expansion gap required
-  Individual, glued down planks and tiles
-  Laying possibilities

LooseLay Longboard

LooseLay Longboard is a collection of 20 woods featuring unique designs in a 1.5m long format. Featuring native Australian species, the collection offers a contemporary palette that makes the most of its 1.5m length and loose lay format.

Korlok 5G[®] accessories

To complete your Korlok rigid core floor, we have five colour coordinated accessories for each design. Our accessories are custom made with unique features such as tapered base plates to suit inbuilt underlay and come in convenient 2.3m lengths for ease of transport and handling. All our accessories are suitable for residential and light commercial use.

Multi Trim

This trim comes with three inserts to allow for joining to a range of alternative materials of different thicknesses.

As its name suggests, the Multi Trim fulfills a number of functions.

1. Expansion Joint cover. For installations over 15m in length or width an expansion joint must be made (usually placed across a door opening).

2. Transition. For joining to carpet where the trim provides cover for both the expansion gap of the floating floor and protection from the pins in carpet

smooth-edge, as well as normal height transitions.

3. Reducer/Ramp. The top cover can be angled to provide a reducer strip down to substrate level, or for adjoining materials of different heights.

Expansion Joint Cover/Transition

Reducer/Ramp

Edge Cap

Edge Caps are one of the most common profiles.

They can be used for a neat finish against sliding doors, full height floor to ceiling windows, carpets, tiled areas and other floor finishes of similar height. This profile is glued to the floor and the floating floor slots into the trim, it has 19mm top coverage.

Split Edge Cap

The Split Edge Cap is an easier to install alternative to the Edge Cap, especially on that all too challenging last row of planks. The base profile is installed prior to the installation of the floor and then the colour coordinated top cover tapped in to place with a rubber mallet to hide the expansion gap.

A great option for DIY installers, the Split Edge Cap is a great solution for finishing to window frames, sliding doors or as a sleek alternative to traditional Scotia.

Stair Nosing

Stair Nosing is a trim used for finishing of steps and staircases neatly. This trim is fixed to the edge of the step using permanent construction adhesive and mechanically where required.

This is used as a transition trim to join step treads and risers (upright, vertical part of the step neatly). The trim accommodates expansion for both tread and riser.

Scotia

Scotia is designed to cover the gap between the wall and the flooring after the floor has been laid. Our scotia measures 19mm by 19mm and is made from high quality moisture resistant WPC.

It has just the right amount of flexibility to follow any slight inconsistencies in the wall.

Environmental

Karndean Designflooring and the environment

At Karndean Designflooring we find inspiration for our products in the beauty of the natural world and feel passionate about bringing this into every product we create. In order to keep our environment protected we do everything we can to continuously improve our manufacturing processes to ensure sustainability whilst delivering best value. We have always aimed to make stylish and durable floors with the lowest possible impact on the environment, and have never had to compromise quality or performance in order to comply with legislation or meet environmental requirements.

Karndean Designflooring is a member of the Green Building Councils of Australia and New Zealand and complies with their requirements under GreenStar. All Karndean products and accessories are manufactured in facilities certified to the ISO 14001 Environmental Management and ISO 9001 Quality Management International Standards. Our approach is based on the use of recycled materials in our floor coverings and ensuring that the finished product is suitable for recycling if required.

What's more...

- All of our packaging is made using recycled material, which we continually review to ensure that it is environmentally friendly and fit for purpose
- We use individual logistical solutions to efficiently and effectively transport our products
- Our storage facilities use high density racking to maximise capacity and minimise impact
- Our offices are introducing innovative energy saving techniques
- We are members of the Green Building Council Australia (GBCA) and Green Building Council New Zealand (NZGBC)
- Our products qualify for eco-points towards GreenStar building projects
- All of our adhesives are water based, solvent-free, have low VOC emissions and are GreenTag certified

GreenStar GreenTag™ certified

The majority of Karndean luxury vinyl ranges are fully certified to Global GreenTag, the third party multi-criteria, consensus based and externally verified Type 1 eco-labelling program. This is one of the largest product sustainability certification systems in Australasia and the only certification mark approved by the Australian Competition and Consumer Commission (ACCC).

GreenTag comprises two certification systems and the majority of Karndean Designflooring luxury vinyl is certified under both.

Scan to read about our **Environmental commitment**

The future

Our continued product innovation focuses on reducing our environmental impact and complying with environmental legislation and recognized certifications worldwide. Our aim is to remain the leading supplier of LVT flooring and to have a market-leading environmental record of achievement through the development of sustainable products and processes.

LCARate™

Life Cycle Analysis is for all products and all rating tools that engage LCA with separate output called an Environmental Product Declaration (EPD), which is a summary LCA report used for certain credits in some rating tools for GreenStar.

GreenRate™

GreenRate is a straight Type 1 eco label developed to meet the requirements of specific green building rating tools. It includes indoor environmental air quality: volatile organic compounds compliant (IEQ VOC) and reduced exposure to pollutants. GreenRate is offered in three levels of quality from Level 'C' up to Level 'A' relevant to GreenStar in Australia and New Zealand.

Karndean Designflooring LVT ranges and adhesives are fully certified under GreenStar GreenRate Level 'A', plus under international FloorScore Indoor Air Quality Certification for low emitting VOC's. Also certified to LCARate "silver streamline".

Transferable purchase warranty

If you purchased your Karndean Designflooring through a Karndean Retail Partner your warranty will have the added benefit of it being transferable. This means that if you sell your house within your guarantee period, you can pass the warranty on to the new owners.

To qualify for a transferable purchase warranty, you must:

- Adhere to the terms and conditions outlined in the transferable purchase warranty
- Purchase from one of our retail partners and they will provide us with your email address to enable us to send you your transferable purchase warranty

For more information or to obtain your transferable purchase warranty, please speak with your local flooring retailer or contact our **Customer Service Team**.

The lifetime residential warranty is defined as 35 years and protects against product wear out and manufacturing defects. What's more, the warranties are now transferable to any future owners (subject to the terms and conditions of the transferable purchase warranty).

Cleaning and maintaining your Karndean floor

Karndean Designflooring is hardwearing and easy to look after. Our enhanced surface treatment helps protect against everyday wear, spills and scuffs. This makes it easier and more environmentally friendly to clean and maintain, giving you peace of mind that your Karndean floor will look great for years to come. We have a dedicated section on the website with videos that explain how best to look after your Karndean floor and covers lots of frequently asked questions from our customers.

Visit www.karndean.com/cleaning for more information.

We also supply our own Floor Care Kits that you can order from your local retailers including everything you need for a simple cleaning routine.

Inside your Floor Care Kit

Regular cleaning with a pH neutral cleaner such as Karndean Clean will help keep your floor at its best.

Over time you may want to treat your floor to some extra care. We recommend every six to twelve months, depending on wear, that you strip and refresh your floor using Karndean Remove and Karndean Refresh, to further enhance its look and durability.

Imagery and Design Reproduction

Photography and print cannot always produce a perfect representation of our products. This includes colour, pattern variation and installation elements used. For this reason we strongly recommend obtaining a product sample and where possible viewing a larger sample in-store. We also recommend visiting our website for information on installation, after care and product selection: www.karndean.com/advice. We love developing new ideas and improving on our existing designs which means that sometimes products are withdrawn at short notice. We hate to disappoint and will work with you to find an alternative design. Please contact Customer Service for more information.
